

Punched brushes standard bodies

We have prepared a catalog of bodies for punched brushes. These bodies are produced as a serial production, and we have them ready in stock.

These brushes/bodies are fitted with a filling material of your choice.

When choosing a production of the brush from a standard body you get the following benefits:

- 1. Faster delivery date** (approx. 10 business days from the order confirmation)
- 2. Better prices**

We believe that if you choose from our catalog you will get a better service in the production and delivery of our products.

Brush discs

Semi-finished products are made of polypropylene and polyvinylchloride panels. Serial brush discs are supplied with carriers with a diameter 30 or 60 mm including screws. Carriers have a thorn with a diameter 8 and 12 mm for attachment. Pre-drilled holes are drilled in these bodies for these screws.

Standard dimensions in mm:

Disc diameter in mm - D	50	90	115	150	180
T - disc height in mm	20	20	20	20	20
Recommended carrier diameter in mm	30	30	60	60	60
Thorn diameter of the carrier in mm	8	8	12	12	12
Drilled hole r in mm	3 / 5	3 / 5	3 / 5 / 7	3 / 5 / 7	3 / 5 / 7
