

Punched brushes – standard bodies

We have prepared a catalog of bodies for punched brushes. These bodies are produced as a serial production, and we have them ready in stock. These brushes/bodies are fitted with a filling material of your choice.

When choosing a production of the brush from a standard body, you get the following benefits:

- 1. Faster delivery date** (approx. 10 business days from the order confirmation)
- 2. Better prices**

We believe that if you choose from our catalog you will get a better service in the production and delivery of our products.

Flexible brush laths

new

Semi-finished products are made from flexible material and have grooves for fixing to a metal sheet thickness of 1-3,5mm. The lath can be also fitted as an „F“ profile.

Standard diameters in mm:

TYPE	T - body height in mm	S - body width in mm	R - hole diameter in mm
Flexible brush lath	18	8	3,5
	23	10	4

Brush laths, base laths, C-profile laths

Semi-finished products are made of polypropylene or polyvinylchloride panels. In stock, we have semi-finished products with a length of 2000mm. Laths can be cut to the desired size. For C-profile laths we are also able to supply these zinc-coated profiles:

Standard diameters in mm:

TYPE	T - body height in mm	S - body width in mm	R - hole diameter
Brush lath Base lath "C" profile	12	15 / 20	3,5 / 5
	15	15 / 20	3,5 / 5 / 7
	20	15 / 20 / 35 / 50	3,5 / 5 / 7
	20	20 / 38	3,5 / 5
