

Punched brushes – standard bodies

We have prepared a catalog of bodies for punched brushes for you. These bodies are produced as a serial production, and we have them ready in stock. These brushes/bodies are fitted with a filling material of your choice.

When choosing a production of the brush from a standard body, you get the following benefits:

- 1. Faster delivery date** (approx. 10 business days from the order confirmation)
- 2. Better prices**

We believe that if you choose from our catalog you will get a better service in the production and delivery of our products.

Rotary roller brushes standard roller bodies

Semi-finished products are made of polyamide or polypropylene rods as roller segments, which can be joined by drilled holes from the side and inserting pins into these holes.

Standard dimensions in mm:

d	D1	R	Nr. of pins/ diameter	L		
				100	200	300
15	40	3 / 5	2 / 4 mm	x	x
